PROFESSIONAL SUMMARY:

Results-driven SDET. QA Engineer with 2+ years of experience in Test - Manual, Automation and SecOps-integrated CI/CD environments. Experienced in Selenium, Playwright, API Testing, Performance Testing, and implementing SAST, DAST, and SCA tools within pipelines. Strong background in Linux systems, Docker, networking fundamentals, and MERN applications. I specialize in building scalable automation frameworks and security-first pipelines that improve product reliability, deployment confidence, and release velocity.

WORK EXPERIENCE

QA Engineer (SDET)@ HEXR Factory Immersive Tech *2024 – Present*

- Designed and implemented scalable automation frameworks using Selenium, Playwright, and TestNG.
- Developed and maintained multi-level Jenkins pipelines for Deployment and SecOps integration.
- Integrated SAST, DAST, SCA, and container security scanning within CI/CD workflows.
- Built automated API testing suites using Postman, Newman, and JUnit.
- Executed performance and load testing using JMeter.
- Generated structured test documentation, execution reports, and Allure Reports.
- Implemented security practices including pre-commit hooks, dependency checks, and image scanning.
- Collaborated closely with DevOps and development teams for release validation and quality gates.
- Managed Dockerized environments and Linux-based test infrastructure.

ACHIEVEMENTS & CERTIFICATION:

- Certified in Manual Testing – QSpiders, Chennai.
  - Completed structured training covering SDLC, STLC, SQL, manual and automation testing, Java full stack, test case design, defect lifecycle, and real-time project exposure.

PROJECTS:

Enterprise CI/CD & SecOps Multi-Pipeline Architecture:

- Designed and managed multiple Jenkins pipelines for Application deployment and Security scanning pipelines
- Integrated DevSecOps: SonarQube (SAST), OWASP Dependency Check (SCA), Trivy & Docker Scout, (Container Security), Gitleaks (Secret Scanning), ZAP (DAST)
- Implemented automated quality gates and reporting mechanisms.

Splitwise Clone (MERN Stack – Three-Tier Application)

- Developed a sandbox full-stack application using MERN (MongoDB, Express, React, Node.js).
- Implemented - REST APIs, Authentication & Authorization, Docker-based containerization. CI/CD integration for deployment
- Used for automation practice, security testing, and performance validation.

SKILLS:

- **Testing Practices:**
  - **Testing:** Unit Testing, Regression Testing, UI Automation, API Testing, Load & Performance Testing, Smoke & Sanity Testing
  - **Compiling and Reporting:** Test Suite Creation, End-to-End Testing, Documentation & Report Generation

- **QA Tools and Platforms:**
  - Selenium (Grid, WebDriver, TestNG), Playwright, Cypress, Postman & Newman, JUnit, JMeter, Jest, Allure Reports, TestSigma, BrowserStack

- **SecOps:**
  - **Practices:** SCA / SAST / DAST / IAST, SBOM Generation, Image Scanning, Precommit Hooks, Branch protection rules, RBAC. OWASP-based Security Validation, Dependency Checks, Composition Analysis and more
  - **Tools**: SonarQube, Gitleaks, Trivy, OWASP ZAP, Docker Scout, OWASP Dependency Check

- **Systems and Networking:**
  - Linux & Windows Administration, Git, Docker, Nginx & Apache, Load Balancing, Reverse Proxy, VPN, HTTP / TLS / SSL, DNS.

- **OS & Virtualization:**
  - Linux - Ubuntu, Debian, Windows Server, IIS, WSL, Docker, LXD, VirtualBox, Jenkins

- **Programming, Development and DBs**
  - **Development**: Python, Java, Groovy, Bash, PowerShell, MERN Stack, HTML, CSS, JavaScript, jQuery, TypeScript, SQL
  - **Databases**: MongoDB, Redis, MySQL, SQLite

- **Developer & Productivity Tools**
  - Git (GitHub, GitLab, Gitea), VS Code, Postman

- **Project Management:**
  - Jira, Confluence, Notion, Obsidian, Excalidraw, Draw.io, Miro
